Explain Everything is an App that allows students to create a video or slide show that has numerous features! It’s like an interactive whiteboard that can be saved as a movie (think a presentation that you don’t need to press each slide).

**Limitations:**
- Explain Everything can be difficult to turn the slides into a video.
- If children do not save their own work and leave it as a back up, it can be automatically deleted.

+ create a new interactive white board. This will give you different colour backdrops.

+ **with slide**
  create a new interactive whiteboard. This will allow you to make the backdrop from photos on the iPad.

**Arrow**
Share your movie – through saving onto Camera Roll or via Showbie.

`i`
has information about Explain Everything. Included is a welcome guided. That has more detail about the program.
Any button on the left has more options, press it twice or hold down.

- Pointer to move around the screen.
- Drawing tool to draw on the whiteboard.
- Add shapes.
- Information.
- Undo/Redo.
- Zoom in and out. Pinch the screen.
